INTRODUCTION.
1915

The publishers herewith present their seventh annual issue of the Richmond-Martinez Directory. Special efforts have been taken to make this volume complete and accurate, and the publishers feel confident that their work will meet with the satisfaction and approval as usual.

A numerical telephone directory of householders, arranged in numerical order on the streets, will be found in this issue. This feature will double the efficiency of the directory as a medium of reference, and will be found to be of greater advantage to our patrons.

The prosperity of a city and its environs is generally determined by its growth in population from year to year.

The estimate of population herewith given can be considered as conservative and readily shows that even in the past year, which has been one of general depression, that Richmond has better than held her own. The favorable showing made can be attributed to Richmond's enviable location as a connecting link between water and rail. New enterprises in manufacturing and commercial lines are steadily locating in Richmond, and those already located are expanding. These enterprises demand added workmen and a steady and healthy growth in numbers of population is assured to Richmond for years to come.

The population of Richmond, based upon the number of names in the directory, is 21,200, which is an increase of 662 during the past year. It is more than three times the population shown by the last government census of 1910, five years ago.

The increase is due, in a measure, to annexation. The last census gave the population of the original district of Richmond; the population recorded by this directory includes the annexed district, but there is no doubt at all that Richmond has had a splendid growth and a long period of prosperity, and there is every indication that it will continue to grow and prosper.

The publishers take pleasure in expressing their thanks for the liberal patronage bestowed upon the work and the uniform courtesy extended to their salesmen.

Respectfully,
R. L. POLK & CO.

R. L. POLK & CO.'S
Richmond and Pullman
DIRECTORY OF HOUSEHOLDERS
1915-1916

In the following list, the Streets, Avenues, etc., are arranged in alphabetical order without regard to location. The number of each residence building on the street is given in numerical order, and opposite the number is printed the name of the householder or householders. To find the occupation of householder, refer to the alphabetical list of names.

Note: The territory covered by the directory of Householders includes that of Richmond Proper, and that portion of Pullman where the numbering on the street is complete. Houses on the sparsely settled streets, bearing no numbers are not noted. The number following the name is the phone number for that house.

RICHMOND STREET GUIDE.
1915-1916

Including Its Adjacent Districts of East Richmond, North Richmond, Point Richmond, Pullman, San Pablo, Rheem, Stege and Rust.

SYSTEM OF NUMBERING.

All the numbered streets that run north and south begin with Number One at the line of the Santa Fe Railway (which runs east and west) and number each way north and south from this point. All streets running south from the Santa Fe tracks are to be designated with the prefix South. Those running north to be designated with no prefix; for example: Number 26 First Street, south of the Santa Fe tracks, would be designated 26 South First, and the same number North of the Santa Fe tracks would be designated as 26 First Street (not using the prefix North).

All the named streets and avenues that run East and West begin with Number 1 at First Street and number each way; East and West, from that point, for example: 26 Barrett Avenue East of First Street is designated as 26 Barrett Avenue (not using the prefix East), 26 Barrett Avenue West of First street would be known at 26 West Barrett Av.

The same system is carried out at Point Richmond. The Santa Fe Railway tracks running North and South there, being the dividing line for all streets crossing it. The prefix West to be used on all streets running West from this point, and no prefix to be used on streets running East from this point.

NOTE: The figures in ( ) denote the distance in block numbers where the street may be located from zero point; the letter preceding the figures denotes the direction from the zero point; the letter preceding the (N 500) determines this street is 5 blocks north of Santa Fe tracks, which is the zero point.
